# UBrush!

## To complete your dental care

Comprehensive oral hygiene is a high priority as a preventive measure. Especially in interdental areas, gingival and periodontal inflammation as well as caries develop increasingly. The patient is often unaware of these relationships, and the importance of interdental space cleaning is often underestimated.

The electric interdental 'UBrush!' supports your patients and facilitates oral hygiene at home! 'UBrush!' with 167 vibrations per second provides thorough, effective interdental care. It can easily be integrated into daily dental care for each patient. A large selection of brushes (diameter 0.5 – 1.2 mm) ensures that every interdental space can be reached and cleaned.

An integrated LED light ensures optimal illumination of the area during cleaning. The control can be done via the supplied mirror.

### UBrush! Set

Content: UBrush! handpiece, stand, battery, mirror, 11 brushes (assortment), instruction for use

Ref.: 35000  
Price: 59,90 €

### UBrush! Refills
