Monoglyc Absorbable Monofilament Sutures

Monoglyc PGA-PCL Suture is a highly pliable monofilament suture, that also absorbs predictably. With the smooth monofilament surface structures, it handles and ties easily, and is virtually inert in tissue. Basically, PGA-PCL sutures behave like PTFE sutures, but do not need to be removed!

24 Sutures Per Box

- Prevents bacterial wicking
- Fully Absorbable in approximately 90 Days
- Compares to Monocryl
- Sharp & high quality premium needle allow for atraumatic passage through tissue.

**BUY 3 GET
ONE FREE**

GLYCOLON SUTURES

GLYCOLON® is a monofilament suture material, whose degradation rate in comparison with PGA is clearly reduced by the specially selected ratio of polyglycolic acid to caprolactone.

- Short absorption time
- Highly flexible with outstanding knotting properties
- Controlled knot run-down with reliable knot security
- Monofilament suture structure: no capillarity, no sawing action
- Very good passage through tissue without additional
- traumatisation
- Optimum tissue compatibility
- GLYCOLON® – specially developed for indications
- with short wound healing:
- Intracutaneous skin closure, Plastic surgery

Gynaecology and obstetrics, Urology

**BUY 3 GET
ONE FREE**

RESOLON SUTURES

Long-term durability with simultaneous high biocompatibility

- Optimal tissue compatibility in the body due to the careful selection of materials and refining process
- Easy removal
- Non-absorbable suture materials remain virtually unchanged in body tissues. Once the scar tissue of the wound edges has become sufficiently strong to hold the wound together, the doctor removes the suture material by simply pulling it out.

Resorba Monofilament Polyamide
Blue 36/box

- Non irritating
- Softer and more subtly
- Easy passage through tissue
- Perfect handling and for consistency knotting

REX PIEZOIMPLANT

The REX PiezoImplant System was designed specifically to manage reduced crestal width.

Its rectangular section mimics the anatomy of the residual crestal bone, allowing for adequate bone thickness to be preserved on the vestibular and lingual sides. This level of bone preservation is not possible with traditional, screw-form implants because their circular section poses a geometrical discrepancy with the anatomy.

The morphological advantages of REX PiezoImplants allow preserving a crestal thickness greater than 1.5 mm buccally and lingually even when the residual crest is only 3.5 mm

Includes:

- Handpiece
- Handpiece support
- Footpedal
- Terminals
- Wrench WR1

TOOTH TRANSFORMER

What's the TT Transformer?

It is a Medical Device that facilitates the work of the Dentist and ensures maximum safety for the patient, using autologous material (the patient's own tooth).

**TALK TO US
ABOUT OUR
RENTAL
TERMS**

An innovative patented system able to transform an extracted tooth into an autologous material for bone regeneration.

TT Transformer® reduces the crystallinity of the hydroxyapatite, the mineral of which teeth are composed, and through its unique procedure makes available the morphogenetic proteins and growth factors present in dentine.

The particulate matter obtained is, therefore, able to determine an osteoinduction mechanism capable of stimulating cellular adhesion, proliferation and differentiation during bone regeneration.

SURGICAL TOOTHBRUSHES

The **VITIS Implant Sulcular** is specifically indicated for cleaning the gingival and/ or peri-implant sulcus.

It can also be used in implant carriers and orthodontic patients.

\$4.95

The **VITIS Implant Toothbrush** is a daily brush specifically designed for patients with dental implants, to provide a delicate and deep care within the whole mouth.

\$5.45

The **VITIS Implant Monotip** is designed specifically to access very small spaces that require maximum cleaning precision of implant-supported prosthesis.

It can also be used in implant carriers and orthodontic patients.

\$4.95

MONET[®]

laser curing light

Cures composites, luting cements, adhesives, and sealants in **1 Second**

Laser curing has major advantages over LED curing. With the Monet laser cure, you will never have to worry about incomplete bonds or soft cures. The Monet laser produces a deeper cure than LED or any other light sources during the same exposure time.

TALK TO US
ABOUT OUR
SPECIAL
TRADE-IN DEAL

Say goodbye to well known LED related problems like:

- LED technology was a significant advancement, but LED curing lights present their own set of challenges.
- LED lights create a light pattern that can be dispersed away from the curing target when the energy from the LED light waves disperse.
- LED is a dispersed light source emitting at random times and random directions.
- LED needs a complicated optical system to collimate and homogenize the light beam

Introducing a new idea on how we see patient treatment. Hubble combines magnification, illumination, & documentation into one piece of equipment designed for more effective patient care.

HUBBLE™

DIGITAL VISION HEAD-SET

Hubble allows the user to control magnification from 1 up to 20x. Hubble takes you beyond the fixed magnification and enhancing limitations that come with a pair of loupes, providing a feature of continuous zoom for fully adjustable magnification all while providing true-color LED illumination. With up to 20x magnification, Hubble eliminates the need for costly and obtrusive microscopes and replaces both loupes and headlights.

Due to a large number of requests for the Hubble Digital Vision Head-Set, we have setup a Pre-Order Deposit to save your place in line. The deposit amount of \$550 is fully refundable, will be applied towards the retail price of \$17,050.00 and will save your place in line.

PROSMATE

15% OFF

ProsMate System

Invented by Prosthodontist Dr Alan Yap, the ProsMate is an effective tool to aid in the efficient and systematic insertion of fixed prostheses.

The Baton allows the simultaneous etching, washing, drying and silanating of porcelain veneers.

With the ProsMate you will be able arrange prostheses in order of insertion, and in addition, you can handle silanted porcelain veneers without touching the bonding surfaces.

Milled out of metal, the ProsMate is autoclavable and can last a lifetime. The ProsMate is a simple yet brilliant system to add to your armamentarium for daily practice.

The Aesthetic kit includes everything you need to get started.

The concept of PRF (Platelet Rich Fibrin) is based on the centrifugation of whole blood without anticoagulants. (J. Choukroun et al. 2001). At the end of the spin, a fibrin clot containing the majority of the platelets and white blood cells is obtained.

This fibrin clot called Platelet Riche Fibrin or PRF will release gradually and growth factors or cytokines in the site (VEGF, PDGF, TGF Beta, Thrombospondin)

The expected objective of these growth factors is to accelerate the soft tissue and bone healing.

CAVITY PHIGHTER TEST STRIPS

Test Strips:

Created with dental professionals in mind, Cavity pHighter test strips measure the oral pH balance to determine cavity risk. Mouth bacteria can lead to increased acidity, resulting in dental erosion and painful cavities.

Cavity pHighter strips measure the pH and buffer capacity in your saliva. Simply wet the pH strip with the patient's saliva, wait 10 seconds, and measure their color reading against the key on the bottle.

The easy-to-use color key will indicate their mouth pH level and associated risk.

Features:

- Easy-to-use strips
- Quick results
- Includes pH risk guide & acidity level comparison

50 Strips per bottle

**BUY 3 GET
ONE FREE**

CAVITY pHIGHTER MINTS

Mints:

Created for at-home and professional dental use, Cavity pHighter Mints protect your patients' teeth after they've left your office. CAO's cavity-fighting mints protect your mouth against acid-producing bacteria by reducing acidity and balancing oral pH levels.

The result? Decreased risk of cavities and minty-fresh-smelling breath!

Don't know if you are at risk for cavities? Cavity pHighter Test Strips quickly and accurately assess your risk level by testing your mouth pH.

Features:

- Peppermint flavor for fresh breath
- Cavity protection
- Take one after each meal for optimal efficacy

Cavity pHighter Mints help protect your patients' mouths against acids produced by hard-to-kill bacteria. Oral bacteria multiply and produce acids that dissolve minerals in teeth, making them more porous and susceptible to cavities.

60 pieces per bottle

DRY MOUTH SOLUTIONS

Dry Mouth Oral Hygiene Gel 65mL

- Provides up to 8 Hours relief from Dry Mouth
- Moisturises, hydrates, soothes & comforts
- Fluoridated formulation, replacing toothpaste

Dry Mouth Oral Hygiene Spray 50mL

- Moisturising, fluoridated oral hygiene spray
- Convenient oral hygiene spray with 360 degree nozzle
- Freshens breath & reduces halitosis (mouth odour)

Denture Adhesive Gel 50mL

- Secures ALL day (naturally) Seals, Cushions & Comforts
- PVM/MA Copolymer "glue" (free) formulation
- Neutral taste, Zinc free, Easy to clean

Moisturising Mouth Spray 60mL

- Convenient and immediate relief from Dry Mouth
- Enhanced moisture delivery with (prop.) chitin
- A 'nod' to the Australian Bush with a hint of lemon myrtle

Moisturising Mouthwash 500mL

- Enriched with all natural moisturising Malic Acid
- Leaves the mouth with a soft, velvety mouth-feel
- pH balanced, moisturising, calming mouth rinse

pH Neutralising Mouthwash 250mL

- Helps prevent enamel erosion
- Naturally assists to neutralise pH levels
- Refreshing flavour, safe to use ongoing

DR MARK'S HYGENIE

Dr Mark's HyGenie® is the simple solution for cleaning your dentures, night guard or Invisalign®. No more soaking in Polident, Steradent, lemon or vinegar solutions, and no more risky hand-held brushing. Simply lock your dental appliance safely inside HyGenie, add DentalFresh, twist and rinse. The high-quality rotating brushes inside do the work for you.

DR MARK'S DENTALFRESH

Mark's DentalFresh® is an easy-to-use, fast acting and fresh scented cleansing gel. Think of it as SOAP for washing your Sports Mouthguard (or dentures, night guard and clear aligners like Invisalign®). DentalFresh cleans dental appliances by washing away biofilms and attacking all the other nasties that collect on your mouthguard in practice or competition, giving you protection against harmful germs and bacteria. And remember, you just can't be 100% with a dirty mouthguard.

DR MARK'S HYGENIE REPLACEMENT BRUSH SET

With daily use, you should replace the brush set in your Dr Mark's HyGenie every 6 months to ensure optimal performance and good oral hygiene. There's no need for an entirely new device, simply replace your old brushes with the new brushes in just 90 seconds.

HYGENIE SPORT

Gone are the days of leaving your mouthguard in the bottom of a sweaty sports bag where it loves to collect dirt, bacteria, germs and who knows what else! HyGenie Sport is the simple solution for cleaning, storing and protecting your mouthguard. After every practice or competition, simply place your mouthguard inside HyGenie Sport, twist, and let the high quality rotating brushes do the work for you. You couldn't ask for an easier way to keep your mouthguard clean.

HYGENIE SPORT CAGE MOUTHGUARD CARRIER

Stop rummaging around the bottom of your bag for your mouthguard. With HyGenie Sport 'Cage' Mouthguard Carrier, you easily protect, store and find your mouthguard. The CAGE is bomb proof mouthguard protection, helping to keep it clean and safe. Clip The CAGE to the outside of your sports bag with the Carabiner Clips included, easy to see, easy to find and combat ready.

HYGENIE SPORT QUICKCLEAN SPRAY 100M

HyGenie Sport QuickClean Spray is a mouthguard sanitiser that quickly and effectively protects you and your mouthguard from the nasties that collect on them during practice, comps or floating around the bottom of your sports bag. Spray QuickClean onto your mouthguard after every use, then store in the CAGE mouthguard carrier and be confident that it's hygienic, protected and combat ready (even if it has been floating around the bottom of your sports bag). It's as easy as that.

EMBI DENTAL GIFT PACK

The perfect bundle to kick-start your patients new oral hygiene routine!

Features

- 100% Wheat Straw
- Eco Friendly
- Good for Travel
- Gentle
- Disposable

EMBI EDGE TONGUE CLEANER

Designed with dentists it's made from dental grade stainless steel and has a unique scoop that gives a deeper clean for your tastebuds. It has uniquely weighted forged stainless steel handles for ergonomic agility and is made by embi – known for their fine craftsman ship and quality.

EMBI EDGE CU29 COPPER TONGUE CLEANER

It's made from the purest quality copper and has a unique scoop that gives a deeper clean for your tastebuds. Copper is known for it's anti-microbial and anti-bacterial properties, which makes it a perfect and effective material for tongue cleaning as it promotes good bacteria and better oral hygiene.

LACALUT®

LACALUT AKTIV TOOTHPASTE

Medical toothpaste – Tightens and strengthens your gums noticeably.
Protects against gum bleeding, periodontitis and caries.

Especially for the prevention of periodontitis and bleeding gums. Sensitivity and sensitivity to pain is reduced, the gums are strengthened and gum disease is prevented.

The LACALUT® result:

- Reduces the teeth's sensitivity to pain
- Prevents gum disease
- Hardens the tooth enamel

MANFLOSS & QUEEN OF CLEAN has been designed to improve your oral hygiene by explaining it simply, in a fun way. Developed by a dental health professional who listened (for 20 years) to the everyday persons' frustrations with flossing, and decided to do something about it.

Finally, there is a luxurious wafer thin but also soft and wide tapes designed to stop you cursing and get you smiling! For the first time ever, precise instructions are enclosed to dispense the frustrations about flossing...learn how length is everything....

A new patented technology for tongue exercise.

Myospots are small biodegradable adhesive pads that are used to exercise tongue muscles and induce nasal breathing.

Myospots are small, circular pads, made of biodegradable natural polymers that are safe for internal use. They have nice colours and flavours that give them a pleasant look and taste and are Vegan friendly. Their strong adhesive power enables them to adhere easily to the surface of the palate. Upon adhering to palate, they involuntarily induce the tongue to elevate and touch them. The repetitive induced movement of the tongue to touch and dissolve the adhered pad provides good exercise for tongue muscles to increase tongue muscles tone.

Using MYOSPOTS daily for several months can help change the tongue posture to rest against the palate.

How to use MYOSPOTS?

Place a MYOSPOT with your thumb against the anterior part of the palate with gentle force for 10 seconds.

Remove your thumb and keep pressing the SPOT using your tongue until it dissolves.

oh!CARE

OH! Care Mouthwash and Gum Serum are your new everyday essential!

This hydration-boosting combo has been formulated with hyaluronic acid and Xylitol to improve oral hygiene without alcohol and harsh chemicals.

Vegan friendly
100% Australian made
Recyclable packaging

TEPE COMPACT TUFT TOOTHBRUSH

TePe Compact Tuft™ is a single tuft brush with a dome-shaped brush head for precision cleaning of hard-to-reach areas, such as implants, attachments for overdentures, fixed braces or along the gum line.

TEPE UNIVERSAL CARE TOOTHBRUSH

TePe Universal Care™ has a unique angle to facilitate access in hard-to-reach areas. Optimal for cleaning on inside surfaces and along the gum line of natural teeth, implants, lingual braces, or retainers.

TEPE SPECIAL CARE

TePe Special Care is an ultra-soft toothbrush recommended after oral surgery and for sore or delicate tissues.

TEPE INTERDENTAL BRUSHES – EXTRA SOFT

An interdental brush is the most efficient, user-friendly device for plaque removal between teeth. TePe Interdental brushes are designed to clean the gaps between the teeth, where a regular toothbrush is unable to reach. This Interdental brush has extra soft filaments for sensitive gums and teeth.

25% OFF

UBrush!
Smile, because UBrush!

UBRUSH! ELECTRIC INTERDENTAL BRUSH

WAS \$130.90
NOW \$98.17

UBrush Electric Interdental Brush is the answer.

This user-friendly electric interdental toothbrush helps you clean between the teeth, both easily and efficiently.

Even the best toothbrushes can't reach the interdental areas. That's why there are alternatives: piks, floss or interdental brushes.

These usually end up being difficult to use, and patients give up. Ask your hygienist or dental therapist to show you how to use the UBrush! It really is easy.

It will convince you how simple it is to clean between the teeth.

SHEER WHITE! TAKE-HOME WHITENING

\$66.75

An advanced teeth whitening formula for dental professionals, Sheer White! Take-Home patient treatment kit for up to 5 more shades of whitening.

Better Retention, Better Revenue, Better Whitening!

Features:

- SheerFilm® Advanced technology
- 20% carbamide peroxide
- Non-slip patented formula
- Reduced sensitivity
- Can be worn while drinking beverages
- 5-day treatment

E-SKIN SPECTROCOLORIMETER

E-Skin is a “single measure and mix” system. The simplicity of the spectrophotometer and ease of use with minimal training make e-Skin the most cost effective digital skin matching solution for today’s clinicians.

E-Skin uses a digital library of nearly 22,000 skin tones to match to patient skin for prosthetic applications.

The e-Skin instrument measures skin colour and instantly retrieves and displays on its screen a matching colorant recipe from its database.

SPECTROMATCH COLOURS

Individual color cartridges for use with the E-Skin Spectromatch System.

Venipuncture for the Application of Blood Concentrates – Book

The benefits of PRF and other blood concentrates are well known in the dental profession, but venipuncture is not a skill dentists naturally possess. In this, as in every form of treatment, providing high-quality care is essential

The Face – Book

For the first time, the highly complex topographic-anatomical relationships of facial anatomy are depicted layer by layer using extremely detailed anatomical illustrations with a three-dimensional aspect.

Piezoelectric Bone Surgery

This book from the inventor of Piezosurgery provides the practical information clinicians need to successfully integrate piezoelectric bone surgery into their practices to improve outcomes in oral surgery and dental implantology.

The Art of Clinical Anaplastology Book

Author: Keith F. Thomas

Print Book, English, 2006
