→ MULTIPIEZO

Looking beautiful is looking really beautiful.

→ **Pulse Mode**
Pulse Mode (level 6 of restorative function) transforms sine wave-shaped ultrasound oscillations to a new profile, characterized by specific power peaks, which results in an optimized performance for extractions and prosthetics.

→ **SOFT MODE**
– special modulation for gentle but still powerful insert movement
– maximum comfort for sensitive patients

insert ME1* 03130001-001
insert ME2* 03130002-001
insert ME3* 03130003-001

The specially shaped inserts ME1, ME2 and ME3 – with a blade thickness of only 0.35 mm – perfectly fulfill the anatomical demands of non surgical extractions. They offer maximum intra-operative sensitivity, allowing a great preservation of alveolar bone and periodontal tissues. Furthermore, the physiological solution guarantees maximum visibility thanks to the cavitation effect which leads to a temporary hemostasis of blood vessels.
