PRF SYSTEM AESTHETICS

The Aesthetic kit includes everything you need to get started.

The concept of PRF (Platelet Rich Fibrin) is based on the centrifugation of whole blood without anticoagulants. (J. Choukroun et al. 2001). At the end of the spin, a fibrin clot containing the majority of the platelets and white blood cells is obtained.

This fibrin clot called Platelet Riche Fibrin or PRF will release gradually and growth factors or cytokines in the site (VEGF, PDGF, TGF Beta, Thrombospondin)

The expected objective of these growth factors is to accelerate the soft tissue and bone healing.

Indications:

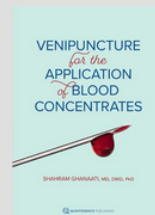

- Skin Rejuvenation
- Acne Scar Treatment
- Hair Restoration

What's in it?

- 1 × PRF DUO QUATTRO Centrifuge
- 1 × I-PRF Purple Tubes - Box of 24
- 1 × Blood collection butterfly with retractable needle - Box of 25
- 1 × Tourniquet
- 1 × PRF Tube Holder

COMPLETE HEAT AND COOLER PRF SYSTEM

Introducing the latest in heating and cooling technology, revolutionizing PRF resorption capabilities!

The Aesthetic Heat and Cooling kit includes everything you need to get started.

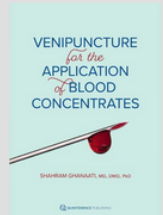

The heating and cooling system is meant to extend the resorption properties of platelet rich fibrin

- 100% autologous
- No chemical additives

What's in it?

- 1 × PRF DUO QUATTRO Centrifuge
- 1 × PRF Heat Device
- 1 × PRF Cooling Device
- 1 × The Face - Book
- 1 × I-PRF Purple Tubes - Box of 24
- 4 × Syringe Luer Slip 3ml with needle - Box of 25
- 50 × Luer Lock 1ml Syringe
- 50 × Triple Tipped Luer Lock Needles
- 100 × Female-Female Luer Lock Syringe Connectors
- 1 × Dermapen
- 30 × Dermapen Needles Cartridge - 24 Needles
- 1 × Blood collection butterfly - Box of 25
- 1 × Alcohol swabs - Box of 100
- 1 × Tourniquet

book with the
purchase of any
PRF System

Indications:

- Biological filler in facial esthetics (**Bio-Filler**)
- Microneedling with PRF

DERMAPEN & NEEDLES CARTRIDGE

This medical-grade tool is effective in treating fine lines, wrinkles, scarring, hyperpigmentation, sun damage, and uneven skin tone and texture.

How does it work?

Skin treatment device that works by creating micro-channels in the skin using needles.

This process causes deliberate trauma to the skin, stimulating the body's natural regenerative process and promoting collagen and elastin production. As a result, the skin becomes firmer, fuller, fine lines and wrinkles are minimized, and scarring is reduced. The pen can be used on any part of the face, neck, neckline, stomach, thighs, buttocks, or scalp, and the treatment can be performed in any direction.

TRIPLE TIPPED LUER LOCK NEEDLES

Linear Multi-Injectors Needles redefine treatment delivery through precision-engineered needle, enhancing procedural efficiency and patient experience.

These single-use, individually packed needles connect to any Luer lock syringe.

- 30 G

LUER LOCK HEAT RESISTANT SYRINGE

Specifically designed for drawing up liquid PRF.

MICRONJET INTRADERMAL DELIVERY PLATFORM

Less than 1mm in size, the MicronJet™ Intradermal Delivery devices MicronJet™ 600 and MicronJet™ 800 offers an easy-to-use, consistent and efficient delivery alternative for virtually painless delivery of substances.

It can be used with any standard syringe to inject liquid therapeutic and aesthetic products directly into the skin, including vaccines, drugs, peptides, dermal fillers, botulinum toxin and more.

MicronJet Intradermal Delivery devices platform is based on MEMS (Micro Electro Mechanical Systems) technology and is made of pure silicon crystal. Not to be confused with silicone oil or rubber, the silicon crystal is one of earth's pure chemical elements known for its robustness and biocompatibility.

Applications:

Aesthetic Products Delivery:

It is safe, making it ideal for thin and delicate skin, effective, non-intimidating, user-friendly, and virtually pain-free.

MicronJet™ is suitable for multiple aesthetic procedures on the face, neck, and decollete areas, accommodating a wide range of aesthetic product viscosities with perfect precision. From skin boosters and Botox treatments for axillary hyperhidrosis to skin rejuvenation, Platelet-Rich Fibrin/ Plasma (PRF & PRP), mesotherapy, and hydration.

VISUAL AESTHETICS AUSTRALIA SKINCARE

Pure, Locally Manufactured Cosmetics

We are thrilled to introduce our latest line of cosmetics, a true labour of love and dedication to purity and quality.

In the overwhelming world of beauty products, where many come with hefty price tags, we have worked closely with specialists in the pharmaceutical and skincare industry.

By combining their extensive knowledge of cosmetic compounding, we aim to bring you pure, medical-grade skincare solutions made from the finest local ingredients, without unnecessary additives.

Hyaluronic Acid Gel 1%

50ml

Deep hydration and plumping effects of our Hyaluronic Acid Gel leaving your skin feeling smooth, soft, and rejuvenated.

Lactic Acid Gel Cleanser

100ml

Experience the benefits of our Lactic Acid Gel Cleanser, featuring 2% lactic acid for exfoliation and hydration, and soothing aloe vera. Suitable for all skin types, this cleanser helps reveal a brighter, more even complexion.

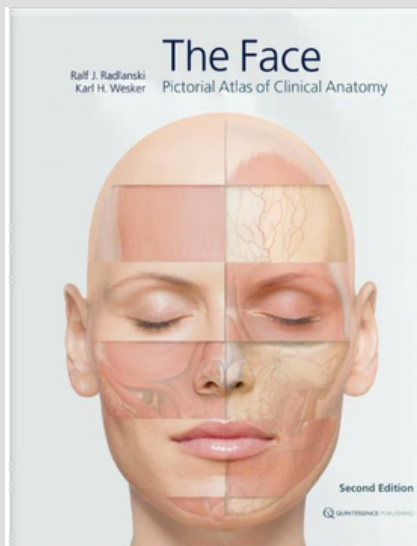

Niacinamide 10% Cream

50ml

Designed to hydrate, lighten scars and redness, and improve skin integrity, this cream is suitable for all skin types.

The Face – Book

For the first time, the highly complex topographic-anatomical relationships of facial anatomy are depicted layer by layer using extremely detailed anatomical illustrations with a three-dimensional aspect.

Important landmarks, anatomical details, and clinically relevant constellations of hard and soft tissues, as well as of nerves and blood vessels, have been detailed.

Another important feature is that the point of view is maintained throughout while moving through the different layers of preparation.

Facial Aesthetics | Cleopatra Technique TM Book

Unlock the Secrets of Timeless Beauty with “Facial Aesthetics: The Cleopatra Technique”

Discover the ancient secrets of beauty and elegance with our groundbreaking new book.

Delve into the methods inspired by Cleopatra herself, designed to enhance your natural beauty and radiate confidence.

WHY BIO-FILLER?

 Visit Website

Bio-filler is an exciting treatment in aesthetics. It works well for reducing fine lines and wrinkles, as well as for adding volume, contouring, and rejuvenating the face, neck, and hands.

Patients prefer the consistency and autologous nature of plasma bio-filler over high-density hyaluronic acid fillers.

Game-changer in the industry, extending PRF resorption from 2-3 weeks to an impressive 4-6 months. This breakthrough involves an advanced heating process post-centrifugation, targeting the platelet-poor plasma (PPP) layer with precise temperatures to denature and reorganize albumin.

The result? Dramatically prolonged PRF efficacy.

This cutting-edge heating and cooling technology draws from extensive use in medicine and dentistry, particularly in facial aesthetics. Heating and denaturing albumin transform liquid PRF into a stable, three-dimensional structure, enhancing its stability and resorption properties upon implantation into host tissues. It's a transformative advancement poised to elevate treatment outcomes.

Q&A

Q: How is Bio Filler PRF obtained?

A: A small amount of the patient's blood is drawn and processed to concentrate the fibrin and platelets, creating the PRF gel.

Q: What are the benefits of using PRF for aesthetic treatments?

A: PRF helps reduce fine lines and wrinkles, adds volume to the face, neck, and hands, enhances facial contours, and improves skin texture and tone. It also promotes healing and tissue regeneration due to its growth factors and cytokines.

Q: What are the main applications of Bio Filler PRF?

A: PRF Gel is used for:

Reducing fine lines and wrinkles., Adding volume to areas of the face, neck, and hands,
Contouring the face for a more youthful appearance., Improving overall skin quality, texture,
and tone.

Q: How is the Bio Filler PRF procedure performed?

A: The PRF gel is injected into the desired areas using fine needles. The procedure is relatively quick and has minimal downtime.

Q: What are the advantages of PRF over traditional fillers?

A: PRF has several advantages over synthetic fillers:

It is a natural filler made from the patient's own blood.

Patients often tolerate PRF better than synthetic fillers.

PRF not only fills but also promotes the regeneration and rejuvenation of the skin.

Q: Why do patients prefer PRF?

A: Patients prefer PRF because it is natural, better tolerated by the body, and has regenerative properties that enhance skin health and appearance.
