

AUTOTRANSPLANTATION OF TEETH (ATT) From Concept to Clinical Mastery

This two-day **intensive course** provides the biological rationale, case selection strategies, and step-by-step protocols required to perform predictable tooth autotransplantation. Includes lectures, case reviews, and hands-on exercises on models and extracted teeth.

DR MITSUHIRO TSUKIBOSHI, DDS, PHD

Dr. Tsukiboshi is a distinguished clinician and researcher with a career spanning more than four decades. He earned his dental degree from Osaka University in 1977 and completed his PhD in Dental Materials at Kyoto University in 1981. Since 1982, he has maintained a private practice while contributing significantly to the fields of dental traumatology and autotransplantation. He has delivered lectures in over 45 countries and has authored numerous scientific publications, including two authoritative textbooks—on dental trauma and autotransplantation—now available in 12 languages. Dr. Tsukiboshi served as President of the International Association of Dental Traumatology from 2009 to 2010 and was honoured with the Jens Ove Andreasen Lifetime Achievement Award in Dental Traumatology in 2018 for his outstanding contributions to the profession.
