AUTOTRANSPLANTATION OF TEETH (ATT)

From Concept to Clinical Mastery

DR MITSUHIRO TSUKIBOSHI, DDS, PHD

A comprehensive **three-day course** provides biological rationale, case selection strategies, and step-by-step protocols required to perform predictable tooth autotransplantation.

Includes lectures, case reviews, hands-on exercises on models and extracted teeth, and a live patient surgery demonstration.

DAY 1

FRI 30 APRIL 2027

LECTURE DAY

Foundation, biological rationale, case selection, treatment planning and step-by-step protocols.

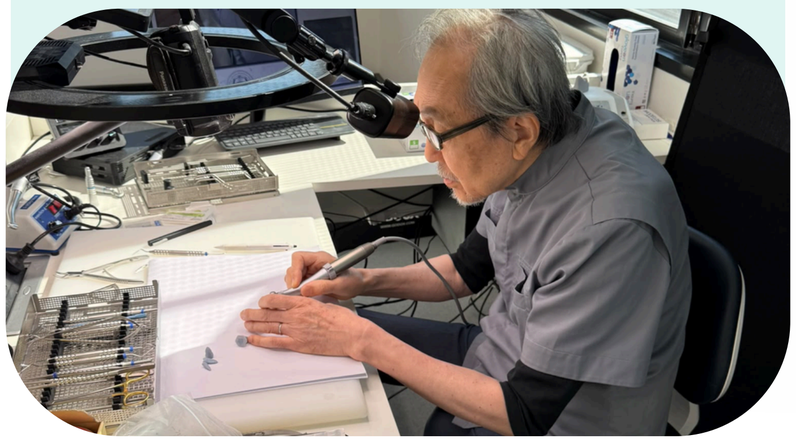

DAY 2

SAT 1 MAY 2027

HANDS-ON DAY

Practical, hands-on exercises on models and extracted teeth to develop surgical skills and confidence

DAY 3

SUN 2 MAY 2027

LIVE SURGERY DAY

Live patient surgery demonstration with step-by-step commentary and discussion.

COURSE CONTENTS

- Brief History of Transplantation
- Wound Healing
- Case selection and treatment planning
- Surgical technique and clinical tips
- Complications and managements
- Follow-up results and long-term outcomes
- Case discussions
