SYDNEY EDITION

Immediate Zirconia Implants

EXCELLENCE FOR HIGH AESTHETIC DEMANDS

LECTURES BY

Dr. David Cowhig

BDS (Lond), FACNEM (Dent)
Dental Wellness, Brisbane

Wednesday, December 2nd, 2026
05:00 pm - 10:00 pm
Hilton Sydney
488 George St, Sydney NSW 2000

Course fee AUD 149

Per participant. Includes cocktail reception, dinner & drinks.
Limited seats.
Turn over for the full programme and registration.

Hosted by SDS Swiss Dental Solutions -
World market leader in ceramic dental implants

Immediate Zirconia Implants: Excellence for high aesthetic demands

Sydney Edition with Dr. David Cowhig · Wednesday, December 2nd, 2026 · Hilton Sydney

ABSTRACT

Rising aesthetic expectations, growing patient demand for metal-free treatment and an expanding understanding of peri-implant biology have driven the development of modern ceramic implant systems. Today, zirconia implants are a scientifically validated and clinically reliable alternative to titanium – particularly in biologically oriented, highly aesthetic treatment concepts.

This Sydney Edition brings the science, the concept and the clinical workflow of immediate zirconia implantology to Australia. Dr. David Cowhig, one of Australia's most experienced clinicians in metal-free dentistry, presents the scientific evidence behind zirconia implants, the Swiss Biohealth Concept as the supporting protocol for maximum success with ceramic implants, the specific advantages of the SDS zirconia implant system, the prosthetic workflow for prepable ceramic implants and a selection of clinical cases from his own practice.

Tim Klippstein, Vice President EMEA at SDS Swiss Dental Solutions, opens the evening with the commercial perspective: how ceramic implants position a practice for a growing, health-conscious patient segment. The programme is designed for dentists and implantologists who want to understand whether and how zirconia implants fit into their daily practice – in a relaxed setting with cocktail reception and dinner.

LEARNING OBJECTIVES

- Understand the key biological and material differences between zirconia and titanium implants.
- Know the current scientific evidence on osseointegration, soft-tissue, response and long-term outcomes of zirconia implants.
- Apply the Swiss Biohealth Concept as the supporting protocol for predictable ceramic implant healing.
- Identify the design features of the SDS implant system – tissue level, Dynamic Thread®, prepable tulip – and their clinical benefits.
- Plan cases for immediate zirconia implant placement, particularly in the aesthetic zone, and the prosthetic workflow for prepable ceramic implants.
- Assess the commercial case for integrating zirconia implants into your practice.

PROGRAMME

05:00 pm	Get-together & cocktail reception Finger food & drinks	
05:45 pm	Commercial advantages of zirconia dental implants	Tim Klippstein
06:00 pm	The science behind zirconia implants	Dr. David Cowhig
06:30 pm	The Swiss Biohealth Concept: The supporting protocol for maximum success with ceramic implants	Dr. David Cowhig
07:00 pm	Coffee break	
07:30 pm	Advantages of the SDS zirconia implant system	Dr. David Cowhig
08:15 pm	Prosthetic workflow for prepable ceramic implants	Dr. David Cowhig
08:30 pm	Case presentations	Dr. David Cowhig
09:00 pm	Q&A	All speakers
09:15 pm	Dinner & drinks	
10:00 pm	End of the evening	

Dr. David Cowhig

BDS (Lond), FACNEM (Dent) · Founder & Principal Dentist, Dental Wellness, Brisbane

Dr. Cowhig has practised hands-on dentistry for more than 36 years, with an enduring passion for the connections between oral and systemic health. In 1998 he founded Dental Wellness in Brisbane, one of Australia's first practices dedicated to biological and metal-free dentistry. He is a Life Fellow of the Australasian College of Nutritional and Environmental Medicine (ACNEM). Dr. Cowhig has been placing ceramic implants for 19 years and lectures on integrating his Oral F.I.T.N.E.S.S. plan to optimise health and longevity and to enable success in metal-free implantology. He is the first dentist in Australia to hold the ISMI and SDS Curriculum in Biological and Ceramic Implantology.

Tim Klippstein

Vice President EMEA · SDS Swiss Dental Solutions AG, Kreuzlingen (Switzerland)

Tim Klippstein is responsible for SDS's Europe, Middle East and Asia markets, including Australia. He supports clinics and partners in integrating ceramic implants and the Swiss Biohealth Concept into daily practice and opens the programme with the commercial perspective on zirconia implants.
